Brent –

Earlier this morning I sent you a couple calendar entries with attachments that I believe may be responsive to the FOIA. I have searched my emails and that is all that I find relevant to this request.

I also searched my files for electronic copies of potentially relevant information. Attached here are some files that I think may be responsive to the FOIA. I did not exclude any that are draft;

I'm not sure of the guidelines/rules about draft materials so I'm providing everything.

That's all I have.

John
